IMPORTANT PATIENT INFORMATION

- Once you begin the medication, it is important that you take it as prescribed until the entire prescription is gone.
- You will need support through your treatment. It is recommended that you contact your local rape crisis center. Also, if you do not have a therapist or insurance to pay for one, payment can be considered through the Crime Victims Compensation.
- Follow-up visits to your physician or another medical practitioner are necessary to monitor your body's reaction to the medication and to be screened for other sexually transmitted diseases and (for women) pregnancy that could not be detected at the time of your visit to the emergency room. Use the following schedule for your visits:
Days following the initial visit to the hospital/emergency room:
Day 7-10 at this time you will be examined and receive a prescription for the remaining 18 days of medication
Day 13: at this time you will be examined and a blood screening will be done to monitor your overall health; women will be tested for pregnancy.
Day 28: at this time another blood screening will be done to monitor your overall health.
- For your follow-up exams, if you do not have a physician, please contact the Kentucky Association for Sexual Assault Programs for the name of the physician specializing in the HIV in your area. (502) 226-2704, or call the Crime Victims Compensation, (800) 469-2120.
- If you have any other expenses related to the crime of which you were a victim, please contact KY Claims Commission for information regarding payment. (800) 469-2120, or (502) 782-8255.
